

Alfalfa Variety Ratings 2021

Winter Survival,
Fall Dormancy &
Pest Resistance
Ratings for
Alfalfa Varieties

This National Alfalfa & Forage Alliance publication is intended for use by Extension and agri-business personnel to satisfy a need for information on characteristics of certified-eligible alfalfa varieties. NAFA updates this publication annually.

WINTER SURVIVAL, FALL DORMANCY & PEST RESISTANCE RATINGS FOR ALFALFA VARIETIES

FALL DORMANCY (FD) RATING DESCRIPTIONS						
FD Rating		Description	FD Rating		Description	
1	2	Very Dormant	6	7	Semi-Dormant	
3	4		8	9		
5			Moderately Dormant	10	11	Very Non-Dormant

FD is the degree of fall alfalfa growth, as a response to temperature and day length. Lower dormancy ratings exhibit less fall growth, while higher dormancy ratings indicate greater fall growth. FD ratings are indices assigned by comparing the height of fall growth with standard check varieties, and tested across locations and years to accurately represent dormancy response across environments.

RESISTANCE RATINGS		
% Resistant Plants	Resistance Class	Class Abbreviations
0-5%	Susceptible	S
6-14%	Low Resistance	LR
15-30%	Moderate Resistance	MR
31-50%	Resistance	R
>50%	High Resistance	HR

WINTER SURVIVAL RATINGS		
Category	Check Variety	Score
Extremely Winterhardy	ZG 9830	1
Very Winterhardy	5262	2
Winterhardy	WL325HQ	3
Moderately Winterhardy	G-2852	4
Slightly Winterhardy	Archer	5
Non-Winterhardy	CUF 101	6

Information is obtained from the Association of Official Seed Certifying Agencies (AOSCA) and the National Alfalfa Variety Review Board (NAVRB) report. Blank spaces indicate the variety has no approved rating through AOSCA.

FD 8

FD 9 - NON-DORMANT

FD 10

This publication provides ratings of alfalfa varieties eligible for certification by seed certifying agencies. It does not list all important characteristics to be considered in the selection of alfalfa varieties. With the exception of some varieties listed as checks, all varieties listed can be purchased in the United States.
